

PRODUCT DATA SHEET

Titan Cantilever Mesh Back Armchair

Code:UTITAN-CL

Our Titan Cantilever Mesh Back Armchair is a sleek and stylish seating solution that combines comfort and functionality. Standout features of the Titan chair are its high back design, providing exceptional support for the back, neck, and shoulders. The mesh back allows air to circulate freely, preventing heat build-up and keeping the user cool and comfortable. The Titan is an excellent choice for organisations looking to create a modern and comfortable seating solution for meetings, conferences, and lectures.
